Co-creating futuristic solutions and software leadership

Nike (\$NKE) 2022-2024

As a Senior Engineer, I supported both frontend & backend Nike Virtual Studios teams, from cloud infrastructure through distributed/blockchain software solutions and mentorship: Elixir, Typescript, React + Next.JS & AWS.

UX (\$UX) 2021-2022

As Head of Engineering, I architected software solutions with my team leads, drove web3/COSMOS projects to Mainnet, including the UX Discord + Web faucet, a slick on-chain/realtime analytics tool and Peggo: Golang, React + Native & GCP.

Dimension 1998-2021

As an as-needed consult, I lead a potent, tight-knit team, ensuring our customers never failed; launched iOS & Android apps, Shopify apps + Storefronts, Podcasts; engineered with: Clojure, Elixir + Phoenix, Dart + Flutter, Next.JS + Typescript, React + Native, Svelte, WebSockets, GraphQL; Postgres, Amazon AWS & Google GCP.

WeedMaps (\$MAPS) 2007-2013

As the co-founder and CTO, I created and bootstrapped startup-through-enterprise, scaling multiple-commas of sustainable revenue, supporting millions of customers monthly and leading the software engineering teams.
